## About Us

Nature Captured our founder Hari Prasad's imagination in 1986 when he started working as a quarry manager.

Since then he has strived to bring nature's beauty to everyone through retail stores in India in 1989 and production units in 1995.

To further his aspirations he started Anjalee Granites in 2003 to reach a global community.

With the desire to control quality and beauty, he in 2010 initiated a Gangsaw factory, Anjalee Granites Private Limited, with the best possible technology, which has now grown to be one of the largest production houses in India, with a production capacity of 2000 containers a year.

Locating this unit in Special Economic zone, close to a plethora of black galaxy, steel grey, black pearl and many other mines, enables us to control the beauty and quantity of our products.
