Aqua Underwater Engineering

<https://www.indiamart.com/aqua-underwater-engineering/>

We are counted amongst the leading names from India, offering a broad range of Underwater Services. Further, we also undertake repair, maintenance works, and new construction projects.

About Us

Established in the year **2007**, "**Aqua Underwater Engineering**" is engaged in rendering international quality Underwater Services. Apart from Underwater Photography, Videography Services, Underwater Construction Services and Underwater Diving Services. We also render services for Underwater Construction and Maintenance & Repair. We strive to deliver highly professional and expert services with our professional drivers, expert underwater engineers, and specialist diving technicians.

Our professionals and experts possess extensive experience in diving and underwater constructions and they make use of latest technology and equipment in rendering unmatched services to the clients. With expert guidance & experience in business management, we have gained prominent status in the respective industry. Our professionals and senior management staff have the background of holding senior management positions in leading underwater engineering & allied services offering companies. We provide completed solutions based on our experience and proven technologies and survey the client's site for scouring damage above and below the waterline. Integrated, cost effective solutions are tailored to fit the specific needs of the clients. We implement fully engineered, safe and environmentally friendly work-site techniques to execute the projects. We are providing repairing and installation services.

Under the efficient management and leadership of our mentor,...
