

# Azad Engineering Private Limited

<https://www.indiamart.com/azad-engineering-limited/>

Manufacturer of gas turbine, blades and steam turbines.

## About Us

Azad Engineering Pvt. Limited, commenced operations in 1983 alongside the associate business - Atlas Fasteners, which was inturn, established earlier in 1981. As a competetive engineering vendor to several leading OEMs , Azad Engineering undertook tasks such as manufacturing forged and precision machined components and several other tailor made products as per client's blue prints. The year 2007 witnessed a major shift, when AZAD Engineering deployed a very contemporary manufacturing facility to produce Turbine blades - a forged precision component, to address the power generation Industry. With a growing diverse clientele, which includes several leading OEMs and service providers across Asia , Europe and America, AZAD continues to grow, with over 250 people now to deliver precision engineering components. Afterall at AZAD precision takes precedence (.)
