# Rasp India Private Limited

<https://www.indiamart.com/btl-india/>

Provides technology services services, software development services, manual testing services etc.

## About Us

BTL is founded on a philosophy that IT today is more than just Information Technology. At BTL, we aim to re-define Information Technology (IT) as Business Technology (BT), where technology is delivered with business knowledge. Central to our philosophy is our understanding of technology and business processes and how our understanding can bridge the gap between IT and business strategy to accelerate clients' business value. We integrate technology with business processes to deliver process-driven and technology-enabled solutions. One of the fundamental keys of our philosophy is the strong emphasis that we give to build long-lasting relationships with our consultants in order to continuously innovate and deliver the best solutions to clients. This also reflects our commitment to act as a trusted advisor and deliver beyond the expectations of our clients.
