Manufacturer of BOD incubator, blood collection monitor etc.

About Us

DEEP INSTRUMENTS , Vasai Road based concern establish in January 2001 started its activity as Microcontroller based controllers and weighing systems. Within the short span of eight years concern entered and started manufacturing quality products for pharmaceutical industries and Blood banks with brand name YUYUTSU . This enhancement of the growth is due to the foresight of the proprietor Yashawant Bhoir, (Electronic Engg.). The team of the concern includes the qualified engineers in respective fields skilled craftsman efficient office staff. All the products are manufactured under strict quality control. The manufacturing activities are carried out in its own premises. Prompt after sales service is also a main criteria of the concern.
