

# Dev Denso Power Ltd.

<https://www.indiamart.com/devdensopower/>

We are a reputed premier **Electrical Projects Executing Organization** in the field of Power Sector since inception in 1980. We do Design Engineering Procurement & Construction and execute the projects on turnkey basis.

# About Us

## A Few Words From M.D 'S Desk-----

When I retrospect on the past five year's performance of DDPL, I feel extremely satisfied that during this short period, DDPL has achieved commendable growth in execution of electrical projects. DDPL's success can be attributed to its pragmatic policies, strong leadership, team effort and endless desire for total client satisfaction at par excellence. Our ability to successfully perform all across the power sector has made us the preferred ones all over the country especially in the northern states. The company has achieved such prominence because of its success in timely execution of projects with eye catching quality of work. During this period we have executed the work of 17 numbers of 220 and 132 KV substations for Haryana and several projects of Rural Electrification work in U.P. under RGVY. Other projects which are in advanced stage of completion are 220/33KV substation at Delhi and 220KV Switchyard at Power Plant in Rajasthan. DDPL group is keen to participate in the growth phase of India and utilize its experience and strengths for overall development of the country. The group's vision is to become a large respected player in the power sector in the country.
