About Us

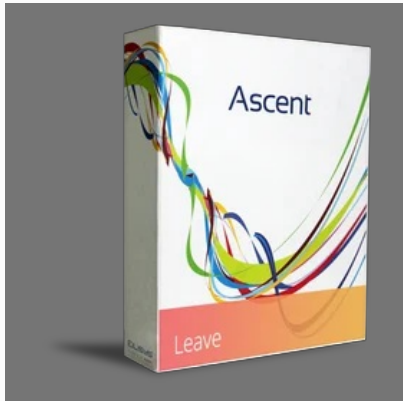

Eilisys has been a company obsessed with customer satisfaction when it comes to simplifying business needs. Our efficiency is our edge and we have dedicated 15 years in successfully delivering smart payroll and HR solutions to you and in evolving and improvising them to help adapt to your current technological needs. We take pride in the fact that we started from the scratch and achieved tremendous growth organically. All of this just because our founder CEO **Mr. Atul Alurkar**, worked with three billion dollar companies, as an MIS consultant and understood the key to simplifying their business processes which led to him devising a product he loved and believed in. Our journey justifies that deep passion and a clear vision teamed up with relentless hard work is the only true formula for success. We believe we have succeeded solely because our satisfied customers speak for our products and that is our greatest sales pitch.
