## About Us

Electromech Engineers (I) had a modest but momentous beginning in 1999 as a company specialized in engineering troubleshooting to provide viable solutions to technological problems and for supplying reliable equipment for sustained trouble-free operation to the industry. It started with two small but intensely active workshops at Dhakuria and Tollygunge in Kolkata, one devoted to the problems in the area of Electrical engineering and the other catering to the needs of the industries based on Mechanical and Metallurgical engineering.

The entrepreneur, spearheading the activities of the organization, is an engineering graduate from the Jadavpur University and a Member of the Institution of Engineers (India), having wide-ranging R & D experience in Govt. of India organization, and in successful accomplishment of challenging foreign assignments. A team of hand-picked competent and devoted professionals completes the working ensemble. Consistent and dedicated endeavors of the group have transformed the fledgling company of the yesteryears into a well-known company in its specialized area with a steadily increasing number of clientele.

During the course of its operation Electromech Engineers (I) has not only developed totally indigenous repair regimen for a number of complex imported machinery, it has also designed and manufactured prototypes for critical Electrical and mechanical spare parts for many such machines. Further, in many cases the company...
