

Rotary Joints

Rotary Joints Specifications of our range:

- Max. Intermittent Saturated Steam Pressure 8.44 Kg/cm² (120 psi)
- Max. Intermittent Saturated Steam Temperature 150°C.
- Max. Hot Oil Pressure 7 Kg/cm²(100 psi).
- Max. Hot Oil Temperature 170°C.
- Max. Rotational Speed 500 RPM

Please Note:

Operation at maximum pressure persistent with maximum speed should be avoided.

FLOTECH SIPHON ELBOW:

We offer two types of siphon systems namely stationary siphon and rotating siphon. Stationary siphon elbow is designed mainly for dryers without manholes and a maximum operating speed of 160 fpm. The elbow comes with a uniform internal diameter, so that there is no flow restriction. These are offered in gun metal construction and in various sizes from 1/4 "up to 1". There are different types of rotating siphons depending on the speed of the dryer.

FLOTECH FLEXIBLE HOSE:

Our range of flexible hoses is available in diverse sizes and material of construction such as stainless steel, Teflon and rubber to suit various applications. We also offer various other products such as:

- Steam Traps
- Carbon Graphite Products
- Industrial Valves
- Strainers
