About Us

More than a hundred years ago, our forefathers acquired the knowledge of gems. They appreciated the value of these positive elements of nature so well that selling the spectacular stones became their way of life. Throughout the years, we have carried this legacy of recognizing fine gems in their most genuine form. And with a view to transforming this passion and experience into an organized business practice, eventually Geoshine Gems India Pvt Ltd was born. Today, Geoshine has its channels spread across India, through which we sell certified gemstones to our discerning customers.
