About Us

Low energy lighting is being promoted world over as the product of the future. LED is the increasingly popular buzzword in interior and exterior lighting design. Light-emitting diodes or Energy-saving Eco-friendly lights, are avariciously being used by architects, electrical consultants in various commercial and residential mega projects. We are proud to state, Glowtech India has over 50 LED lighting products to suit Indian conditions and replace most of the existing conventional light fittings.

GLOWTECH INDIA 3rd Generation LED's are of 80 - 110 Lumens per watt with perfect heat sink for longevity of the LEDs' life & colour. Our success in the industry has come due to our sustained drive for excellence and commitment in delivering practical and reliable lighting solutions. As integrated service providers, the company is in relentless pursuit to maximize the interest of our esteemed clientele. Our professionally qualified management team never fails to give personal, meticulous attention to every project. The Glowtech India team, is also the most approachable, courteous and efficient, ever willing to share its expertise and be of prompt service. Glowtech India- as a brand name stands for constantly updated awareness of global technological trends, bringing to customers the most Eco-friendly & User-friendly technologically advanced LED products. Led Products: The small size and directional light emission of LED's offer the potential for innovative,...
