About Us

HBL Power Systems Ltd is a listed Indian company, in business since 1977, with a focus on engineered products and services. Our initial business strategy was to identify technology gaps in India that the company could fill by 'indigenous efforts'. The first products selected and successfully developed were Aircraft batteries - eventually leading to HBL offering the worlds widest range of specialized batteries. Our expertise in batteries generated opportunities and ideas to diversify. The company moved into new businesses and markets that utilise our batteries, such as industrial electronics, defense electronics, and railway electronic signaling. Recent diversification, leveraging the companies engineering strengths, has led to new businesses in precision manufacturing, spun reinforced concrete and 'green' technology products. Our success has been built serving some of the world's most demanding customers and applications. We would value your opportunity to serve your business.
