About Us

We began our journey in **1999**. Since then **Hindusthan Engineering Company** is a leading manufacturer and supplier of Asphalt Mixture Machine, Vibrating Machine, Concrete Mixture Machine, Tar Boiler Machine and many more high quality products. Our products are in demand by many of the leading companies nationwide. Our Concrete mixers are most popular in civil construction for better concrete. It's also compact and ideally suited. Our concrete mixers are built by the engineers to run continuously. On the basis of our world class service and the quality of the products manufactured, we have earned such a good name and customer satisfaction. Product brand in which we deal is "Sufala" The range of concrete mixers we provide have a range of 10/7 CFT hopper type, 7/5 CFT and 5/3 CFT without hopper with diesel engine or electric motor. Our concrete mixers are simple in design that any layman can handle it without any stress. This business venture began with the backbone, **Mr. Amiya Dey** who is the proprietor of our company. He has years of expertise and has been guiding us in every field to get optimum output. We manufacture our products by using high tech machinery which is checked and maintained at all times. At Hindustan Engineering, we thrive to provide our customers with our best product, so that we can get the maximum customer satisfaction. As per the clients requirements we modify our products and services from time to time. Backed...
