About Us

Kailash Traders was established in the year 2011. We are the leading Distributor, Wholesaler and Trader of Pesticides, Fertilizers, Insecticide, Herbicides etc. Modern science has changed and developed from the conventional methods of farming to new conservative and non chemical methods. This is done to give way to modern, mechanized and environment friendly equipment & technology. Our intention and aim is to promote small scale industries in India which do not get exposure in domestic market. Use environment friendly organic and bio products for agricultural usage and latest irrigation technology.

We are focused on anything innovative that has to do with promotion of optimum agriculture products like organic, bio, environment friendly, quality conscious, innovative, cost effective fertilizers. Due to high quality standards, our chemicals are successfully meeting the different requirements of several commercial as well as agricultural grade sectors. We always strive hard for excellence in quality of chemicals and client support services in order to complete clients' product specific demands.
