About Us

The year 2008 marks Kodai Dairy's 35'th year in business, as a local family-owned Dairy in Kodaikanal. Commencing with just six suppliers, the factory was officially opened in 1973. In the early days horse-drawn wagons were used to collect 50 liters of milk per day, seven days a week. At present we have a throughput of 12,000 liters of milk and manufacture approximately 400 tones of cheese per year. From the beginning our goal was to make good Natural cheese. The result, "Kodai Cheese" - the complete line is made with the freshest milk, experience and from authentic recipes. We have successfully utilized whey, created in the cheese making process for making organic compost being used on the property. All vegetation, fodder, flowers, fruit & other trees etc., grown on the property, is by using the manure we produce and by treating the effluents we create. We are wholly committed to preserving the environment and to spread the word to the community around us, by example. The aim has only been to create and leave behind a better environment for future generations.

Kodai Dairy Products (P) Ltd. is always working towards upgrading quality and will shortly achieve accreditation with HACCP and ISO 9002. A program set to ensure food safety measures are followed with TQM(total quality management). This family venture is consistently growing.
