K.S. Engineering Company

<https://www.indiamart.com/ks-engineering-co/>

We are leading name in providing better services in repairing&rewinding of electrical machines. Our company is also an authorised dealer of Kirloskar's transformers and alternators, which successfully meet the needs of various industries.

About Us

Established in the year **1992**, our company is engaged in the manufacturing of Transformers and providing them in both domestic and international markets and are one of the leading service providers of **generators, transformers and dc motors** in India.

Our customers are benefited from unparalleled combination of leadership in technology, excellence in operation and flexibility in process. The well qualified team of technicians and experienced engineers work closely with the clients to understand their requirements and offer best options for their specific application needs. We also maintain and follow strict quality assurance procedure for electrical, installation, and maintenance of each product. Each of our products are fully tested for quality characteristics prior to shipment.
