## About Us

**Lakshminag Solar Power Private Limited** has achieved laurels in this sector which was established in the year **2015** and is located in **Hyderabad, Telangana (India)**. We are providing our customers a best quality range of solar products. We have established ourselves as a dominant **trader** of **Solar Water Heater, Solar Inverter, Solar Panel, Solar Water Pump** and many more. Our offered products are known for their less maintenance and optimum quality features.

Gondela Vijaya a graduate in the field of Electronics and Telecommunication from NIT Warangal and Post Graduate diploma in Materials Management has around 30 years of experience in Indian Industry. Vijaya with the support other family and friends has started the company. We have a competent team to handle sales, design and engineering, production and installation, operations and maintenance function. The team has more than 5 years of experience in solar products and systems. We can provide installations throughout the country.

In many buildings, roof is one area which is not utilized and sometimes locked. Photovoltaic arrays in buildings are often either integrated into them, or mounted on their roofs. Arrays are most often retrofitted into existing buildings, usually mounted on top of the existing roof structure. Many of rooftop applications are done in small and medium-sized installations for consumption within the buildings that host the arrays. There are some...
