We are one of the noted importers and suppliers of an extensive range of Electrical and Electronic Automation Products and Systems. These are known for their resistance towards high voltage, dimensional accuracy and vibration resistance features.

## About Us

Established in the year 1986, we, **Mahavir Group** are amongst the leading importers and suppliers of a comprehensive range of **Electrical & Electronic Automation Products and Systems**. The company was initially founded by our **owner Mr. Manish Magia**, who has 12 years of industry experience. Our products and systems are widely appreciated for their high end features like resistance towards high voltage & corrosion, easy operation in alternate current as well as direct current based systems and vibration resistance. These products & systems find extensive utilization in electrical & automotive industries further; we also supply these to various panel builders and OEMs. We source our complete product range from the most reliable and trusted manufacturing companies that make use of quality raw material as well as latest manufacturing techniques. Moreover, to ensure that our procured range of products & systems complies with international quality standards; our team of quality controllers conducts stringent quality checks that are based on various parameters. We have a spacious and highly automated warehouse that helps in storing the products & systems in an organized manner. Besides, with the help of our wide distribution network, we are able to distribute the systems throughout the country. Our distribution channel is effective in targeting and reaching the defined market segment. With our ethical business practices, we are...
