About Us

Medicraft Technologies, a leading medical engineering group with team of experts in Surgical clean room engineering, having their Registered office located in Chennai, Factory with most modern production technology located in S5, GK Industrial Park, Lalgudi road, Trichy and Operating office at Cochin, Kerala.

We provide Total engineering solution for Operation Theatres, to achieve zero bacteria sterile environment. Our Stainless Steel Operation theatres with Ultra Clean Laminar Air Flow System conform all global standards, meeting all engineering architectural and clinical requirements, and flexible enough to accomodate future incorporation of modern equipment in a theatre complex. Submit Laminar Air flow system is so designed to maintain accuracy in environmental air parameters. All the built in facilities are accessible from outside the theatre, and thereby avoid the need of disturbing clean areas during routine maintenance. In addition to that, we focus in finding innovative solutions for all engineering as well as environmental challenges in Surgical Clean rooms in highest quality standards. We have a team of highly competent and experienced engineers and technicians to deliver the best equipment with most efficient and friendly after sales service. Our Engineering professionals with 20 plus years experience in similar field, are known to the industry, an accepted for their dedication, commitment and reliability.
