About Us

The Mind Plus (Dr Kala Nursing Home) was the first private psychiatry hospital in Ludhiana; established in 1986 we provide evidence based treatments for mental health and neuropsychiatric conditions. For over 25 years, we have been a reputable centre for patients with complex mental health conditions, and often treat patients who have not responded to first line interventions by physicians or other mental health professionals. We routinely provide inpatient treatment to patients from all over North India, and often from further afield and overseas.

We have a team of qualified and experienced multidisciplinary professionals who ensure that patients receive individualized patient centred treatment.

We are also a centre recognized for training of various mental health professionals. A number of other psychiatrists, who are now working successfully in individual private practices in Ludhiana and elsewhere, have at one point or another trained with us. We have trained a number of psychologists in a variety of "talking therapies" and are a recognized centre for psychiatric nursing training. We continue to offer a range of training opportunities for professionals interested in a career in mental health.

We offer easily accessible, fast and effective treatment for most mental health conditions and addictions. We can offer you an appointment with a specialist consultant, usually within 24 hours. We can then devise a personalised programme...
