## About Us

**MINI MACHINE TOOLS** incepted in **1969** is an establishment of metrology with industrial character and has made its presence felt in the engineering industry through its various manufacturing activities. The company was founded by Dr. M. Balasubramanian, a doctorate in engineering from Technical University, Dresden, a dynamic leader with a great vision along with a team of upbeat engineers, technicians, operators and members of other faculties. The company focuses on catering to the requirements of precision granite and cast iron equipments for every industry and quality control room. Why only **MINI MACHINE TOOLS** We do not believe in compromising with the quality, reliability and efficiency of our products at all. We trust in going beyond just selling a product to total customer satisfaction. Backed by experience gained over 43 years, we offer the largest and widest range of inspection equipments that is truly trustworthy.
