About Us

M & M Engineers boasts of the state of the art technology built on an area of 14000 sq.ft. We have advanced machineries & the skilled workforce which bring out the best in the product. We are also equipped with the latest softwares which complement our work towards excellence.

M & M Engineers was started in the year 2003 by Mr K.N.Shankar, a Mechanical Engineer by qualification with core competency in Press tool design & manufacturing , Tool room & Sheet metal production activities. Mr K.N. Shankar , the proprietor has served in many esteemed organizations in various capacities. He had more than 15 years of industrial experience before venturing into the business. The business is intended for the design & development of press tools , panel checkers , manufacture of sheet metal parts & fabricated assemblies. - See more at:
