About Us

MP Agency was established in the year 1995. We are the leading Wholesale Sellers of Fresh Fruits. Quality is a prime forte of our organization, which we follow while exporting the range of Fresh Fruits. These products are efficiently quality tested after their procurement so as to provide the best quality range to our customers. In addition to this, we have hired a team of quality auditors and food inspectors, which diligently inspect each product for its high quality and nutritional content. Our sound relationship with our vendors who are highly recognized for their range of fruits has helped us immensely in maintaining our market credibility. We implement ethical business transactions with our esteemed vendors and take pride to be associated with them. Owing to our longstanding relation with our vendors, we have successfully accomplished an unrivaled position in the market.

We make sure that all our honorable customers avail from us the best quality and natural variety of Fresh Fruits. Though, it is believed that when the competition in the market rises, it becomes difficult to improve customer satisfaction, yet, we have been successful in keeping close relations with our clients in the industry. This long-term association is a result of our ethical business strategies and the sampling policy, which we provide to the customers. Our esteemed customers can avail from us samples of fruits at product cost along with delivery charges.
