About Us

No matter if you're a man, women or child. Black, white or somewhere in between with total hair loss or just a receding hairline; our hair systems are custom-made from the ground up to fit every inch, bump and zag of your head and hair loss pattern.
There are specially designed wigs for cancer patients who may be experiencing scalp sensitivity while having medical treatments. The Natural Wig Works provide soft base materials inside the cap for comfort. The soft base materials prevent irritation for sensitive scalps. These extremely light weight cranial hair prostheses are an excellent solution for the woman who wants ease of care and has little time to spend on styling.A human hair wig is the most natural looking option. It can be cut, styled, permed or colored to suit your personal taste. Human hair wigs are more durable than synthetic wigs. However, human hair wigs are more expensive than synthetic wigs and require more care. They have to be shampooed, dried, styled and conditioned, just like your natural hair. Like your hair, they can lose their style if they get wet and frizz on humid days.
