About Us

NAYANAS is a brain child of young energetic professionals coming from the IT background. The power of women entrepreneurship is increasing and opening new doors of business to Indian women. The idea of NAYANAS is a first step towards our journey into ecommerce's world of women fashion. NAYANAS is founded by Mrs Sailaja Deol. The business model is traditional and also is proven; the uniqueness is the differentiation of what we promote, how we sell. The e-commoners are vast and many online shops are available, the first challenge is how we sell and what we sell. We clearly acknowledge the path and respect the challenge. At Nayan's we believe on selection, what we post into catalog. We were active online shoppers at a given time and end up spending hours together browsing between sites and calculating between discount deals. The long list of catalogs and puzzling discounts & coupons most of the time confuses us than helping us to pick the best. So, NAYANAS is created with a passion of selling only what we like. What it means, our catalogs are simple, small but effective. We refresh very frequently and constantly strive to keep fresh designs for your ease of selection. We will ensure our cost & quality of the product are to the best. Our motto is to create simple and comfort of online shopping to our customers. Our delivery channels are same like most of the leading online shoppers follow. We don't want to reinvent the wheel here at this point and like...
