We at **COSMIC INDUSTRIAL SOLUTIONS** welcome enquiries to brief our products and service profile for your ready reference with total turn key solutions in compressed air technology for all applications.

## About Us

Incepted in **1991** by **Mr. Anil Kohli**, we got certified by NABL in the field of industrial electrical testing services and are serving more than 800 clients. Our organization is an expertise in the field of Residual Life Assessment (RLA) of Transformer for determining the Life Estimation to prioritize replacement of transformer to ensure cost effectiveness. We predominantly serves to various Power Utilities, Industrial organizations and Power Project Companies which install and maintain the Power, Distribution, Furnace, Rectifier and various other purposes transformers. Our laboratory which is certified by **NABL based on ISO 17025** along with multidisciplinary facility has enabled us to provide complete **chemical, electrical and mechanical analysis**. These capabilities allow us in finding the root cause of the problem to provide corrective actions. For complete client satisfaction, we provide solutions for problems requiring method development, customized solutions and investigations along with life estimation and life extension services for decreasing the total cost of ownership.
