About Us

The NewGen solution is ideal for companies and institutions that require a reliable source of energy (power, heat & steam) and that have a desire to reduce their carbon footprint by using renewable energy. Target clients include Coffee & Tea Plantations, Schools, Factories / Mills, and Office Buildings. NewGen provides clients with an end-to-end, turnkey, solution. We take on the technical risks and the up-front costs of setting up a clean energy generation system at our client's site. The clients are able to consume the energy produced – without any capital investment – at prices that are competitive to existing retail energy rates. Clients are able to reduce annual expenditure on energy with a consistent and reliable source of power. They continue to focus on their core businesses without having to deal with the distractions and challenges associated with managing a quality power generation operation.
