Since 1986, we started providing services to the Indian healthcare industry. We have been providing best quality natural products which include over 3500 rare and exotic herbs, spices, seeds and other natural materials which are used by companies.

About Us

Since 1986, we started providing services to the Indian healthcare industry. We have been providing best quality natural products which include over 3500 rare and exotic herbs, spices, seeds and other natural materials which are used by companies like Dabur, Himalaya healthcare, Divya Pharmacy and so many other world class companies to manufacture best quality Ayurvedic, Unani medicines and natural products.

In 2011, Nutramine Life Sciences was incorporated with a vision to provide these rare herbs, spices and other natural products directly to the consumer. Our product line includes all natural nutrition, weight management, disease specific and personal care products that can help them pursue an active and healthy lifestyle. Ayurveda and Unani are traditional forms of medicines that have been practised in India and around the world over centuries and have helped to cure and prevent numerous diseases without any side effects.

We at Nutramine Life Sciences wish to promote the same traditional medicinal culture by providing the consumers with the un-adulterated and purest forms of herbs and other materials used in the Ayurveda and Unani medicine.

The consumer has never had an access to these rare herbs and spices as they are either hard to find or are not available in the market for them to use. Moreover, the consumer is never sure if the products manufactured by ayurvedic and unani companies really do contain those rare herbs or not?
