## About Us

One of the principal objectives of this training program is to impart industrial orientation training/education to the final year Graduate & Post Graduate Pharmacy (B-Pharmacy & M-Pharmacy) students from the Colleges/Universities who aspire to build their career in the pharmaceutical industry. At the end of this training program, the participants can expect to find a transition from inexperienced college students to mature individuals capable of handling equipments and delivering to Pharmaceutical industry requirements. This training can help as a good career option and the candidate, after training, should be able to be easily inducted in the job and can expect to perform significantly better than a fresh university graduate..
