## The Basics of Drawing

The first true factor is use of art material and the way you hold your pencil or pressure of your hand. For Different Design you need Different kind of techniques in drawing

## About Us

To begin, try contour drawing. First, arrange a few items on a table. Looking at the items more and the paper less, attempt to sketch just the outer lines of the shapes, as if you were moving your fingertip along the outside edges of each thing. Do not shade in at this point. Just concentrate on the outlines. Next, try another contour drawing, but use a softer or blunter pencil this time. Compare the two drawings. Notice the change in the thickness of the lines when you changed pencils. A majestic waterfall. A charming village. A peaceful mountain stream. With the help of the simple instructions in this article, you can learn to draw some of the most lovely and stunning landscapes in our world. Even if you've never seen some of these landscapes in person.
