

Furthermore, optional features can be provided to clients as per their requirement. Some of the optional features are as follows:

- Extended shaft: Is required for bending angle, tee Sections square/rounds flats etc., in appropriate sizes
- Conical bending attachment: - This attachment is required for bending conical shapes. The top roll is tilted and the smaller ID of cone rolls along the conical bending attachment
- Top Roll positive drive for rolling thin sheets
- Smaller diameter additional Top Roll for rolling smaller diameter pipes using reduced thickness plates
- Dies for Rolling of angles, channels, pipes, flats
- Pinch attachment for edge pinching
- Top Roll Hydraulic operated with power pack
- Manual grease pump for effective lubrication

Specification: Pyramid Type M. S. Plate bending Machine

Capacity in mm for M.S.	Top roll mm	Bottom roll mm	motor HP.
