

# Pulse Electronics And Control

<https://www.indiamart.com/pulse-electronics/>

Manufacturer of 36 w micro minolta fitting, heavy duty electronic ballast, hellozen transformer, electronic ballast etc.

## About Us

We ?pulse electronics & control? are leading manufacturers and suppliers of electrical & control products which are Voltage stabilizer, single phasing preventer, panel Hooter, on delay Timer & 24 Hours Multy Range Timer etc. Our diversified range of products include consumer, commercial and industrial lighting as well as street lighting as well as ballasts and other products

We started our journey in a small industrial area in Ahmadabad, Gujarat. We are presently successfully running our business under the guidance of our Mentor Mr. Raju patel. His extensive industry experience of many years guides us to deliver qualitative product range as per the specifications provided by the clients. At present We have strong market with our control products

Lighting is very important, everyone agrees, but not everyone ends up with a space that is lit to suit it. Appropriate lighting creates a special ambiance. The beauty of your room does not only depend upon the furniture you have used or by the colors on the walls, but also on the lighting you choose to use in it. Appropriate lighting fixtures can change the whole appearance of your interior setting to produce a dramatic effect. The ordinary looking objects of your home will suddenly transform into objects of beauty once the effervescent rays of the dazzling light fixtures fall on them.
