About Us

RFIC system Technologies is a product and design service company in bangalore, India for CMOS RFIC system . We are dealing with business in wireless system design, development. We are offering service for your product till to the market, Our expertise is mainly in CMOS RFIC chip using different foundry and wireless system design development , We are developing multi GHZ wireless ICs in CMOS technologies. Innovative low cost embedded system product for school, office. hotel, hospital and event. RFIC IP We Have RFIC IP full and blocks of trans-receiver using TSMC foundry 180 nm, 130nm and 90 nm process. Wireless system Attendance recorder system using RFID technology, the system includes software, firmware and the hardware with support engineers available 9.00 to 6.00 PM every weekdays. RFIC design and development Service As an expert in wireless technology, rf design, analog design for system, circuit, layout, testing and optimization, we are offering design , development service with best performance and moderate cost The service includes rfc design , analog ic design, wireless, rfid, system, circuit, layout, testing,and product certification. Expert in complete wireless system, Projects are taking place onsite and offshore We have successfully delivered wireless products to our customers. We have expertise in complete transceivers for any wireless system, Which includes transmitter and receiver architectures, circuit design and layout of the analog, RF, mixed signal...
