About Us

We manufacture 28,000 tons per annum of Grey Iron and Ductile Iron Castings using Cupola and Induction Furnaces. Our production facility is spread across 86 thousand square feet, having two furnaces. It is integrated with modern day machines and latest technology. We have adequate testing facility to ensure product quality. With change being the buzzword and awareness coupled with the will to accept challenges. We at RSU took more challenges and gave way to the vehement desires within ourselves for ultimate satisfaction disguised as success.
