About Us

We, at **Shree Hans Alloys Limited (Shal)** are engaged in **manufacturing and exporting** a wide range of steel & stainless castings in different metallurgical specifications. These include stainless steel, HRCS, Alloy 20, cast steel, nickel based & carbon steel castings.

Located at 201, GIDC Dholka near Ahmedabad, our well developed infrastructure with complete production facilities is spread over an area of 20,400 sq. meters. This helps us in manufacturing various kinds of castings, as per the specifications provided by the clients. Established in 1984 with a view to manufacture highest quality castings available at very competitive prices and provide prompt delivery to all customers in India and abroad. The Company manufactures products for customers who expect perfection.

Today the company has earned a reputation in pumps & valves industry, mining and mineral industries by setting high business standards, in depth engineering knowledge and experience, with a solemn commitment to maintain the highest quality standards and just-in-time delivery. We constantly aim to improve our products & services to meet our customers' specific requirements. We, at our end are bringing continuous improvement to all areas, including our processes, engineering know-how, product development & innovation, as well as the expertise of our workforce. We keep in close contact with our customers, suppliers & logistic partners to help...
