About Us

Robust IT Infrastructure is critical for IT-enabled businesses. You need a neutral IT Infrastructure consultant to map business requirements to available technologies and solutions. Soffit offers reliable end-to-end IT Infrastructure services that give your business the right thrust to move forward.Soffit Infrastructure Services (Pvt) Limited has carved a niche for itself over the past few years as a dedicated and competent Infrastructure Management Support Company. Our Team of Engineers exposed to divergent technologies and expertise in multiple platforms have rendered support to Business Enterprises, both in the SME sector with less than 50 users and for large Business Establishments with thousands of users. With a process driven support delivery methodology, strengthened with updated knowledge and skill levels, we have delighted our customers through our Managed Services, Technical Services, Audit and Assessments and Consultancies. While being a strong service provider in our own right, we have also developed a Partner model wherein we have offered our strong support services to selected associates through shared services. These associates, with limited resources and skill at their command, are able to get assurance of a dedicated Support Delivery mechanism through their association with Soffit, and in turn succeed in raising the level of their service.
