<https://www.indiamart.com/sonadka/>

We are an ISO 9001:2000 certified manufacturer and exporter of water purifier units, filter housing, purifier candles and other accessories. Our precision products are widely applicable for domestic and industrial uses.

## About Us

We have come a long way, since the inception of Sonadka in 1984, carving a niche in the market by manufacturing and supplying a meticulous range of water purification candles, water purifier connectors, engineered water purifiers and its accessories. Our products are widely used as original equipment by India's leading companies for their impeccable quality and life long performance. We manufacture latest models of UV water purifiers to be used in domestic and industrial conditions by a team of expert engineers and committed workforce. This has motivated us to hold established benchmark in the industry and control the global market. Our continuous efforts towards producing superior quality products in the market have driven us to adopt latest technology from Bhabha Atomic Research Centre (BARC). Utilizing this, an online domestic water purifier is developed which does not require electricity or running water but is capable to remove 99.99% bacteria from water.
