So when you use UNIVERSAL DIAMOND cutting tools your satisfaction is guaranteed as regards to durability and perfection.

Quality that makes shines

To give a perfect edge or shine to precious metals [gold, silver, or platinum] and other metals [brass, copper or aluminum] you need more perfect diamond cutting tools [faceting tools]. These tools are used for faceting & designing non-ferrous metals too. We have a system, that gives our tools the quality and the durability that is needed. QUALITY CONTROL [QC] is emphasized on brazing, turning, planning and many other factors, that helps our tools to be more perfect in high quality. Selected diamond is used as a raw material to give you the value for your money. The edge of quality, shining and soft cutting is the main prime concern areas of UNIVERSAL DIAMOND TOOLS. Set up in 1983 and since then we had set an edge on diamond cutting tools [faceting tools]. International are is where we focus to our durability and perfection.
