## About Us

With a couple of manufacturing setups in Mumbai employing a good number of skilled personnel, we manufacture automation products mainly serving the plastic and machine tools industry. We pride ourselves in being the only company in India to design, develop, and manufacture cost-effective automation products in-house that are at par with respective heavyweight brands in terms of quality, reliability and operateability. Our reputation as a market leader in plastic molding automation products helps us not only to cater Indian market but also other worldwide markets. With an annual turnover of over 1 million US\$, and growing at a rate 30% annually reflects our market potential in this segment of the industry. We constantly strive to maintain and upgrade our product quality standards by strictly implementing a zero quality-deviation policy on our supply chains and rapidly addressing technological product needs respectively. Such policies help us to deliver cutting-edge products that are safe, power efficient and rugged for all working environments. Our double digit growth over the years is a clear sign of our product market value and volume penetration. Experience With nearly two decades of successfully serving this automation-specific sector we amassed sizeable experience in domains of electrical systems, electronics control systems, embedded software systems, instrumentation and hydraulics. The organization is led by highly experienced technocrats having strong technical...
