Our presence in the industry started with the mission, which is to serve the educational industry as the standard against which we weigh our actions and decisions to create value and make a difference in this ever growing industry.

About Us

Our presence in the industry started with the mission, which is to serve the educational industry as the standard against which we weigh our actions and decisions to create value and make a difference in this ever growing industry.

Now the company has attained an enviable position in the market as a trademark manufacturer, exporter and supplier of a wide range of scientific instruments and educational items including Laboratory Glassware, physics, Chemistry laboratory Instruments, Electronics, Electrical, Mechanical, Civil Engineering laboratories Equipment Instruments and All type of Mechanical Machinery, Biological model & Dissecting Microscopes, Student Microscopes, Medical Microscopes, Engineering working or non-working models, Audio Visual Aids, Research Equipment, all Hospitals & Industrial Requirements etc.

Made from superlative raw materials, our products are a reflection of superiority, perfection, accuracy and longevity. Our products are used on a large scale in many schools, colleges and engineering institutes. Our wide market presence is the result of our strong and robust distribution network spread far and wide. Also, our competitive price range and adherence to timely delivery schedules further give us an additional edge over our competitors.

In addition to our standard specification, we also undertake to design and manufacturer the goods as per your specifications. In our untiring efforts to further improve the quality of our products,...
