About Us

We have optimized our product portfolio to offer you one-stop solutions in the turning, milling, and automation technologies. For trend setting solutions in milling and turning technologies, our product range includes both cost effective standard machines to cutting edge high-tech machines for complex machining applications.

With these range of innovative products, ABS meets the challenges posed by growing market requirements and offers our customers market-driven solutions. We also offer our customers comprehensive technological services which are consistently market oriented, based on the technological leadership of our products.
