About Us

Accura Polytech is promoted by Mr. H.R.Shukla, technocrat and Mr. Rasik Thakkar, enterprising NRI businessman based at Dubai. Realizing the need to save the depleting natural resources viz. wood and saving forests, new challenging concept of 'ACCUCEL' the best environment friendly alternative was introduced in 1995 in Indian market. Modern and state of art factory is situated at village Iyawa, Sanand in state of Gujarat, India having 3 Acres of Land and 20,000 Sq. Ft built up area. Production capacity of Accucel profiles is 500 MT per annum and specialized fabrication & finishing facilities are established to execute large turnkey projects for interior work and develop value added furniture & building products.

Latest technology developed in Italy only in early '90s is incorporated keeping in mind developing trends and high quality requirements. Precision extrusion dies for variety sections imported from Italy provide premium elegant finish and accurate cell structure with integral skin meeting designer's needs. Research and Development as well as testing facilities keeps the technology continuously upgraded at par with international standards.

Creating market awareness is the biggest task for this new developing concept. Our design team interacts with specifiers like architects, interior designer, builders and corporate bodies and develop innovative solutions to creative ideas for different applications. We are trying to conserve...
