Acme Synthetic Chemicals

<https://www.indiamart.com/acmesynthetic/>

We are a leading Manufacturer and exporter of chromatographic adsorbents, perfumery ingredients and high purity fatty acids and their derivatives. We do contract manufacturing.

About Us

Acme Synthetic Chemicals was set up in 1970. From inception the emphasis has been on rigorous internal R&D to develop cost effective environmentally friendly processes for producing technically complex products of the highest quality. Acme's product range can be grouped mainly around Castor Oil Derivatives, Perfumery Ingredients, Chromatographic Adsorbents, Lipids and Speciality Chemicals mainly based on oils and fats. Over the years Acme has mastered and specialized in techniques for isolation, separation and purifications of difficult to purify fatty acids such as Oleic Acid (99% by GC) and Linoleic Acid (99% by GC). Acme has developed a global market on the strength of assured top quality, fair prices and un-failing adherence to delivery schedules. We do contract manufacturing. Production Process Involved **Reactions / Operations**

- * Esterifications - Transesterifications
- * O-Alkylations
- * Alkoxide based Condesations. Aldol, Claisen, Dieckmann & Darzen's Condensations.
- * Friedel - Crafts Acylations.
- * Bouveault - Blanc Reductions.
- * Baeyer - Villiger Oxidations.
- * Oxidation - Dehydrogenation.
- * Reduction - Hydrogenation.
- * Separation of close boiling components by fractional distillation.
