About Us

ASCI believes in the foundation of technology, that Computer science has brought new opportunities and challenges to traditional study style, and has changed the foundational concepts in education. Further major progress in computer science would only be feasible when education system provides sound foundations for areas of software engineering and knowledge engineering. ASCI has taken up that responsibility for the development of student in the field of computer science. Our main GOAL is to establish a strong technical foundation for next generation so that they can move their step with the technology. ASCI (CONDUCTED BY PURUSHOTTAM FOUNDATION) certified by DOEACC (Govt. organization) provides the library and information services. At ASCI, resources covering all the main IT areas and schools of thought, reflecting the academic focus of the INSTITUTE. The library contains a growing collection of online and actual resources on a variety of subjects.
