

AFT Production

Aft India offers and provides copy protection and license control solutions for software, video and virtually any other content. Aft India offers a complete suite of anti-piracy and secure content delivery solutions.

About Us

Aft India offers and provides copy protection and license control solutions for software, video and virtually any other content. Since we effectively and reliably secure the valuable properties of our large and small clients. Aft India offers a complete suite of anti-piracy and secure content delivery solutions that help publishers protect their products and maximize revenues. Our products offer unparalleled quality in both strength and ease of use. The streamlined product design and robust yet versatile anti-piracy DRM technology allow you to protect virtually any type of data online and on offline media in minutes. Video games, software, documents, drawings, images, audio files, offline web pages and even proprietary file formats can all be protected with just a few mouse clicks. No programming skills required whatsoever. DVDs, USB Flash Drive, the Internet – no matter how you chose to deliver your content, you can benefit from the same outstanding feature-rich data protection and your customers can enjoy the same unified user experience.
