## About Us

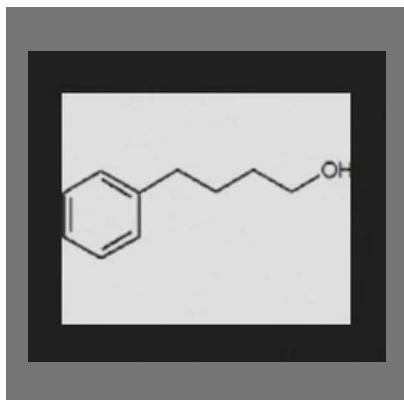

Alchem Synthron Pvt. Ltd. (ASPL) is involved in Research & Development of designing a novel and techno-commercially viable processes to manufacture bulk actives (active pharmaceutical ingredients, APIs) intermediates, agrochemicals, Perfumery-flavoring ingredients including impurity and metabolites preparation. ASPL is a technology & knowledge driven enterprise, offering new/optimize organic process chemistry solutions. ASPL has its core strength in synthetic organic chemistry & creation of knowledge based on global chemical industry and derives its strength from its highly dedicated team of professional who specialize and posses rich industry experience in synthetic chemistry. ASPL provides custom manufacturing services with process development expertise from gram to kilo and then multi-kilo scale process optimization. This comprises of optimizing synthetic methods essential for synthesizing products that are of interest and demand in local and international markets. We also suggest new synthetic option(non-infringing)to the target which is more practicle and can be scale-up to commercial scale. We have also initiated some work towards designing NCE's as Immuno-Suppressants agents. To enable this we have highly qualified and trained personnel. Presently, we are in process of getting approval from Department of Scientific and Industrial Research, Government of India to recognize the Research & Development laboratory of ASPL.

## OTHER PRODUCTS:

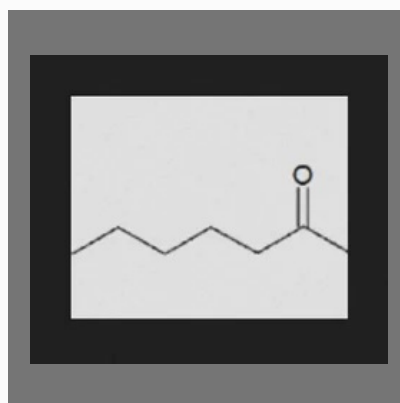

4Phenylbutanol

Tertiary Butyl Nitrite

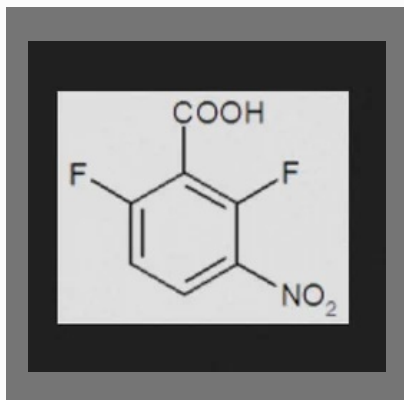

4 4'-2-Chloroacetyl Biphenyl

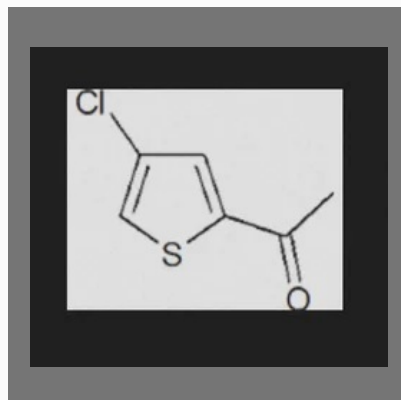

Ethyl Malonyl Chloride

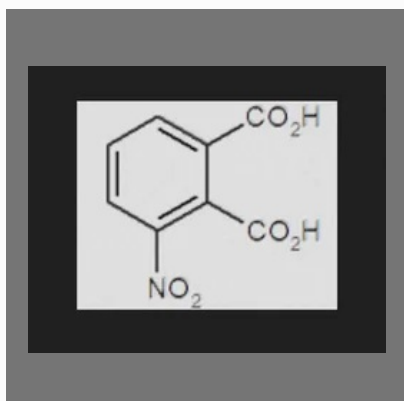

## OTHER PRODUCTS:

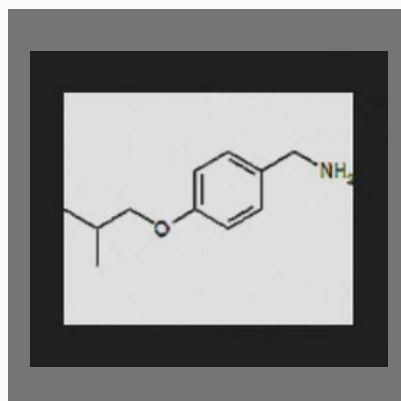

2,6-Difluoro-3-Nitrobenzoic Acid

2-Acetyl-4-Chlorothiophene

3-Nitrophthalic Acid

4-Isobutoxybenzylamine

# Factsheet

Nature of Business

:Exporter and Manufacturer
