About Us

ALF Engineering Pvt Ltd is an auto ancillary, a company established in 1980 in suburban Mumbai. It is now recognized as a leading supplier to OE's in India.

Currently its main business area is the chassis frame, suspension assemblies and hydroformed components for SUV's, MUV', LCV's. ALF is working on new opportunities in the heavier segment.

ALF has, since 2007, shown the way in indigenous design and development of hydroformed components as OE for automotive majors. Displaying a pro-active approach, ALF has already invested in 7 hydroforming presses (1000 - 5000 Tons) and has a centralized Hydroforming Facility at Nasik.

Since technology is at the centre of all development, ALF has a Design Centre at Nasik for supporting customers in the development of hydroformed components – concept – simulation – tooling development – prototyping. Subsequently production is ramped up, at a suitable plant location.
