About Us

Encompassing the five principles of customisation, functionality, creativity, technology and vaasthu(in lieu with climatology). As architects our strength lies in customising or creating a unique design for our clients specific demands ... like any true passionate architect , but we as a team find beauty in everything and so we can do justice to a contemporary style as well as vernacular concept , try out fusion and arrive at a satisfying design to all. As planners we look at spaces for their usage , be it transitional in nature , for circulation , occupational in terms of character and ventilation in terms of habitant comfort . Ever willing to experiment with built form , volume or sheer expanse/compactness of spaces , to create feelings like awe , interest , or an acknowledgement for it's existence .. we believe that a space or form can be common , unique , inspiring , dominating or at the best pleasant and comfortable and hence a feeling has to be experienced by the very unique treatment given to the form or space in size or volume or material by a visitor or habitant and so we strive conscientiously towards such goals. ..respecting the budgetary constraints of the client. At this juncture , when the babies from kindergarten are advocating green we are looking forward to working as consulting green architects ... brimming with information , zeal and a...
