Amit Cellulose Products

<https://www.indiamart.com/amitcelluloseproducts/>

Manufacturers of Natural Gums, Cellulose derivatives, Starch derivatives and Alginate derivatives. Specialized in custom applications for binders, thickeners and stabilizers.

About Us

It is rightly said that the beginnings of all great things were small. Amit Group of Companies has its humble beginning in the year 1978 envisioned by our Founder Director Mr. Chinubhai Shah. With limited manufacturing facilities for Gum Acacia and Guar Gum, the Group began its journey. Chinubhai's leadership soon saw the organization establishing a strong foothold in the pharmaceutical industry. With Amit taking over the reins of the Group in 1992, our horizons expanded. We forayed into the research of several new products and explored the possibilities in various new industries. His constant endeavor to learn more and his thirst to study every new development in the field have set in 'A culture of intense enquiry' at AGC. This culture is at the base of all our research and development activities. It's because of this culture that the last decade has seen a ten times growth in our client base and product range, as also a multifold improvement in our production capabilities. With a rich experience of over 28 years in the manufacturing of specialty chemicals, AGC develops all the products indigenously.
