About Us

Amps Automation is one of the CNC Controller, VMC Controller, PID Controller, PLC And SPB Controller, Multi AC Drive, PLC Based Automation Systems, etc Repairing and Maintenance Service Company.

The company was established by Munifa with the original aim to provide engineering maintenance services specifically for CNC Controller of electronic platforms.

We see our role as not only providing our customers with the most cost effective and up to date equipment but also being able to provide the correct advice & repairing.

Our business has always been maintenance & repairing services and because we have developed a reputation for excellence in this area it has allowed us to grow into other service areas.
